

## Community Friday Update

6-24-16

Greetings! I hope this update finds you doing well and enjoying your summer! This week I thought I'd offer a "virtual tour" through the school so you can see what's going on with a few of our projects this summer. In addition to these projects the custodial and paint crews are completing the usual cleaning, waxing, and touch-up. There are a few other projects in the works, as well...hopefully time will allow us to complete a few more before students return in August. Enjoy the "tour" and have a great week!

The old Varsity Lockers (Boys) relocated to JH Locker Room (basement). They are awaiting electrostatic painting. The floor will also be part of the epoxy/chip project we're doing in all locker rooms and basement hallway.

Varsity Locker Room – minus the new lockers. The block base will feature an integral bench and locker base. The floor will be epoxied and new lockers will be here in July. The girls' varsity locker room (lockers) will also receive a new coat of electrostatic paint. All of the above projects are funded by permanent improvement funds.

Thanks to our generous Athletic Booster organization, a new rubber floor has been installed in the weight room.

The "old" high school library minus the last remaining bookshelves. For our purposes the bookshelves were not needed and this opens the space up for other uses.

Waste not, want not! The old bookshelves were installed in the elementary store room off the cafeteria to house the Guided Reading books (currently stored in the old middle school library). The resources will be more readily available to our elementary staff now.

I couldn't leave out the work the custodial staff is doing in the classrooms...just one "shining" example above!
